Hyderabad, Telangana 500034

PERSONAL SUMMARY

I'm a driven developer who swapped mechanical engineering for code, fueled by a passion for building solutions that matter. Specializing in the MERN stack and Python, I create scalable, user-friendly web and IoT applications with clean, efficient code. I love collaborating with teams, learning new tech, and making a real impact through innovative digital experiences.

TECHNICAL SKILLS

Programming Languages:

JavaScript

Python

Frontend Development:

React.js

HTML

CSS

Bootstrap

Tailwind CSS

Responsive Design (UI/UX)

Backend Development:

Node.js

Express.js

REST API

Sockets

Database:

MongoDB

Version Control:

Git

Real-Time Communication:

WebSockets (sockets)

IoT & Engineering:

IoT (Internet of Things)

AutoCAD

PROFESSIONAL EXPERIENCE

JUNIOR SOFTWARE DEVELOPER | 12/2023 to Current

Brihaspathi Technologies Limited - Hyderabad, Telangana

Secure File Management System

Tech Stack: React, Node.js, Express.js, MongoDB

Role: Full Stack Developer

Responsibilities:

- Developed a role-based file management system to securely share critical documents among authorized users.
- Implemented user authentication and login features with encrypted access control for admins and super admins.
- Designed and integrated a responsive React frontend for managing file uploads, downloads, and user access.
- Built secure backend APIs using Express.js and MongoDB to handle encrypted file storage and permission checks.
- Ensured system reliability and data integrity through testing, error handling, and activity logging mechanisms.

Dynamic website for Trinai.ai

Tech Stack: React, Node.js, MongoDB, Tailwind CSS

Role: Full Stack Developer

Responsibilities:

- Designed and built a dynamic and responsive front-end using React and Tailwind CSS.
- Developed backend RESTful APIs using Node.js and integrated with MongoDB for data persistence.
- Ensured SEO optimization and mobile responsiveness.
- Deployed the web application and maintained uptime and performance.

Dynamic Website for Akshara Degree College

Tech Stack: MERN Stack (MongoDB, Express, React, Node.js)

Role: Backend & Frontend Developer

Responsibilities:

- Developed a full-stack web application for student and admin management using the MERN stack.
- Implemented secure authentication, role-based access, and real-time attendance and performance modules.
- Built and integrated REST APIs with React for seamless CRUD operations and state management.
- Collaborated with faculty to gather requirements and customize workflows to academic needs.
- Led end-to-end development, including testing, deployment, and performance optimization.

Visitor Management System for Brihaspathi(Cloud based VMS)

Tech Stack: React, Flask, MongoDB, AWS

Role: Lead Developer

Responsibilities:

- Designed a scalable system to track visitor entries and exits securely.
- Integrated facial recognition and real-time data display features.
- Developed API endpoints using Flask and handled cloud deployment on AWS.
- Incorporated role-based access control for security.

Chat Bot UI for Brihaspathi Query Bot

Tech Stack: React, Node.js, Tailwind CSS

Role: Frontend Developer

Responsibilities:

- Developed an interactive chat interface to support customer inquiries.
- Integrated with backend APIs powered by LLAMA3.2 and vector search.
- Enabled dynamic redirection to forms and quotation flows via React Router.
- Designed a user-friendly, mobile-first layout with Tailwind CSS.

AI-Based Visitor Management System UI

Tech Stack: React, Tailwind CSS, FastAPI, FaceNet

Role: Frontend Developer + AI Integrator

Responsibilities:

- Designed the UI to display facial recognition-based logs and alerts.
- Integrated with AI backend (FastAPI + FaceNet model) for real-time recognition.
- Focused on intuitive dashboards and live video feeds.
- Ensured high responsiveness and seamless data updates via WebSockets.

EDUCATION

Swarnandhra College of Engineering

B.Tech

Mechanical Engineering, **01/2023**

GPA: CGPA: 7.69

Col. D.S. Raju Polytechnic - Andhra Pradesh

Diploma

Mechanical Engineering, **01/2019**

GPA: 74%

S.N.S. Lenin High School - Andhra Pradesh

SSC

01/2016

GPA: CGPA: 7.8

TRAININGS

Completed 6-month training at Pavan Bhargav Honda, Bhimavaram, sharpening technical skills in a real-world setting in 2019.

LANGUAGES

- English
- Telugu

CERTIFICATIONS AND ACHIEVEMENTS

- IoT Technologies Certification, 2022, Built 3 mini-projects with Arduino to dive into smart systems.
- CAD Design Certification, 2022, Mastered 3D modeling for engineering solutions.
- District Collector Award, Honored for exceptional service as District Coordinator during election duties.
